

The Role of the Regulators in the Adoption of Nature-Based Solutions

Regulatory Functions

Quality of Services

Regulators capacity to guide NBS investment plans is dependent on clear, defined roles and accountability across institutional actors and with customers.

Economic

Incentives and guidance can be provided to ensure cost effective and equitable financial mechanisms that include NBS approaches.

Environment & Resource Management

NBS can meet benefits across sectors, addressing environmental and water targets. Mandates can be met through coordination.

Health & Water Quality

NBS can be included as options for meeting performance targets. Benefits from NBS require monitoring and quantifying benefits that need information to be shared.

Regulatory Actions

Contribute to policy and/or strategy.

Help improve legislations by identifying barriers and incentives.

Promote innovation, capacity building and raising awareness.

Adapt contractual provisions to incorporate NBS.

Develop an assessment system that can adapt to these new solutions.

Create right incentives to have better and more protected sources.

Incorporate considerations about NBS into the tariff setting process and creation of economic incentives.

Behavioral Regulation
